Artologik®

SOFTWARE FOR THE WEB

SIMPLE AND SMART

ADMINISTRATIVE PROGRAMS IN YOUR BROWSER

5

SMART WEB BASED PROGRAMS DESIGNED TO WORK – ON YOUR CONDITIONS.

This defines our business ideology! When we began developing our web based programs the idea was to make them user-friendly, simple and smart. We believe in intelligent simplicity and once you start using our software you will realise that smart solutions does not have to be difficult.

The benefits of Artologik®
- All of the Artologik programs are web based. This means no client installation is required. A browser is all you need.
- It is easy to work with our programs. User-friendliness is always our focus and if you know how to use the internet the rest is easy.
- Program updates are managed centrally on a web server. This saves time and money compared to updating each separate computer.
- Since the programs are web based you swiftly reach them over the internet. This means you can work wherever – whenever.
- The programs are multilingual and you can easily work with different languages within them – at the same time.
- All of the Artologik programs are easily integrated with existing intranets and extranets.

In other words: The Artologik programs are developed with a user focus in order to fulfill your requirements. This is our contribution to the myth about the inventive Swede.

Artologik Survey&Report is the survey tool which helps you get the information you and your organisation are in need of.

Templates let you create your surveys in an easy manner and after the respondents have answered, a report is compiled with only a few clicks. This is the survey tool that gives you access to the answers you need in order to make good and relevant decisions!

"We are using Survey&Report in the quality management and controlling of our school. Regular surveys for our students, professors and our training enterprises are conducted with the software."
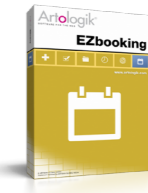

MICHAEL WÖRNER
BBS HANDEL (GERMANY)

Artologik HelpDesk is the tool for those in need of a simple and easily managed ticketing software. Apart from ticketing functions you also get access to smart functions like FAQ, a knowledge base and SLA.

The program lets you manage internal and external support matters and since all customer communication is saved, knowledge and experience within the organisation come to better use.

"The Helpdesk reporting capabilities help us keep track of ongoing support requirements and prioritise them."

MAXIMILIANO LOTTO,
COSWORTH (GREAT BRITAIN)

Artologik EZbooking is the booking program which helps you get all internal bookings in order, whether is it rooms, people or other objects.

Since the system is centralized you always have access to the latest booking information, which in turn ensure that no un-wanted double bookings are made. With the flexible user management you easily control who books what – and when.

"For us the biggest advantage is the ability to produce monthly reports. This has greatly improved the efficiency in generating the monthly accounts."

DR FRANK BRINK, AUSTRALIAN NATIONAL UNIVERSITY (AUSTRALIA)

Artologik ProjectManager makes project management an easy process and gives you a practical overview of the organisation's activities.

ProjectManager also allows you to create salary and invoice data and you can print invoices from within the program. You get a good overview of how the projects proceed and gather the information you need, all in one place.

"ProjectManager gives us a good overview of all our projects. The reports and the detailed information about planned and used time also help us plan new projects in a better way."

LILIAN ZWEIFEL, STÄMPFLI PUBLIKATIONEN AG (SWITZERLAND)

Artologik TIME makes time management so easy it actually gets done! You can register your time wherever you are, as long as you have access to a computer with an internet connection.

TIME helps project managers and project members keep track of how the time is spent on the different projects. It is also possible to, with just a few clicks of a button, create invoice and salary reports.

"We use the system to register time on our customers - so we know exactly the time consumption for each customer. We are very satisfied with the system, and would recommend it to others".

METTE BRITT NIELSEN
SERVIO A/S (DENMARK)

ABOUT US

The Artologik series is developed and sold by Artisan Global Media, a Swedish company with offices in Växjö and Oskarshamn.

"Simplicity in a smart way" has been our guideline since the start in 1995. Web applications should be easy to use. That is why our solutions and programs are characterised by user-friendliness, functionality and flexibility. The Artologik programs are multilingual and used in more than 30 different countries.

Our customers can be found within both the private and the public sector. Our mission is to help them become more profitable through simplified information flows. It is not difficult. It is smart.

We want our customers to be satisfied and we believe in an absolute commitment to each client and project, from the first meeting to the final delivery and support. In order for our customers to feel confident that the software is what they are looking for, we always offer a free full version trial for 30 days to let them evaluate the program at their own pace.
